A Strong Performing, Low Risk, Focused Mid-Cap Solution

Three Reasons to Consider the Value Line Mid Cap Focused Fund:

1. Focused Strategy 2. Impressive Risk-Adjusted Results 3. Outperformance

Mid-cap stocks are often called the “**sweet spot of investing**” because of their favorable risk adjusted returns relative to the large-cap and small-cap universe. With the **Value Line Mid Cap Focused Fund**, the “sweet spot” just got a little sweeter. We hold a select group of our “best ideas” in the mid-cap space—companies that have generally experienced consistent growth in both earnings and stock price over 10 years or more—and have proven themselves by standing the test of time.

1. Focused Strategy

The Fund owns a limited number of companies by design, generally holding 25 to 50 stocks. Rather than holding small positions in many different mid-cap companies, we concentrate on our “best ideas” and allocate a meaningful percentage to each holding.

2. Impressive Risk-Adjusted Results

Not only has the Fund earned Morningstar’s “Low” risk rating for the 3, 5 and 10-year periods as of June 30, 2025, but it has outpaced its peers in risk adjusted return for each period, as measured by Sharpe Ratio.

The Fund’s Sharpe Ratio placed it in the top 4% or better in its category over the 5 and 10-year periods as of June 30, 2025.

There are risks associated with investing in small and mid cap stocks, which tend to be more volatile and less liquid than stocks of large companies, including the risk of price fluctuations.

The Morningstar Rating™ for funds, or "star rating" is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Fund (VLIFX/VLMIX) received 3 stars for the 3-year period, 5 stars for the 5-year period and 5 stars for the 10-year period ended 6/30/2025, among 479, 446 and 367 mid-cap growth funds, respectively. © 2025 Morningstar, Inc.
